Short Description	LCVP Development Group Meeting 7, December 5th 2024
Agenda Item	Notes
Updates	A brief overview of the timeline for consultation provided by the Executive.
Strands of study: new structure of Applied Portfolio Tasks (APT) and LOs	Strong broad welcome for the applied portfolio task structure and subsumed unifying strand. The APT's achieve the purpose as was set out in the unifying strand, while scaffolding students in developing and structuring their portfolios. Some guidance on how teachers could use them and engage students would be useful. A few edits to various LOs would improve them and clarity on various terms (portfolio, profile, statement) would be helpful. Strand 2 in Module 2 is now focused on work which should be reflected in the module and strand titles.
Additional Assessment Component	A new model of a personal profile and yearly stimulus was welcomed as a step forward from the current LCVP model and offers a potentially genuine authentic multi-modal assessment which could avoid becoming static. The APT's could be a sustainable and practical way to inform the development of the proposed profile. It makes sense for the main sections or headings within the personal profile to align to the strands of study. The personal profile must remain relevant for all two years of the course and the breakdown of the 60% weighting needs careful consideration.
Potential names and teaching for student learning	Potential names were considered for the Link Modules. A new name must encompass ideas like community, life, work and personal development, while being succinct. A draft teaching for student learning section was welcomed with various improvements suggested.
Next steps	The Chair reflected on the work completed to date and thanked members for their attendance and contributions. Next meeting: January 8th, 2025
