

LC Chemistry	Development Group Meeting #3 02/12/2019 Short Description
Agenda Item	Notes
Governance and consultation insights	Previous minutes agreed. Early insights from the BP consultation and early insights review of JC were shared with the SDG member with a view to offering evidence they could relate to when going about their work.
Overview and development of a proposed structure	The revised purpose, aims and objectives document and proposed structure for Chemistry were shared with group members. Informed by these and keeping in mind the requirements of the brief (in particular a coursework component), members reviewed the proposed structure and core concepts and offered suggestions for revisions and additions.
Towards a coherent curriculum	In light of development of the structure, group members were asked to consider how to incorporate a coursework component aligned to the aims, purpose and objectives.
Next steps	Next Meeting Wednesday 15th January 2020 The chair reflected on the work done, suggested a doodle poll for a 5 th meeting and thanked the members for their attendance and contributions.
