

An introduction to Maths Talk

What is Maths Talk?

Maths Talk is a collaborative process where children's thinking, strategies and ideas are discussed, shared and/or exchanged. Using Maths Talk in classrooms can help reveal children's understanding and misunderstandings. It can support their maths learning by boosting memory, developing maths language, promoting deeper reasoning as well as developing social skills across all subjects. Maths Talk in classrooms can be categorised as probing, responsive, eliciting and correcting. Although all have a place in developing conceptual understanding it is important that probing and responsive discourse become the more dominant aspects of Maths Talk in the classroom.

Maths Talk is defined as '... patterned ways of using questioning, explaining, listening, and different modes of communication in the classroom to promote conceptual understanding in math for all learners.'

(Sztain *et al.* 2020)

Where will I start?

Building an atmosphere and culture of respect and risk-taking is critical to the success and impact of using Maths Talk in supporting conceptual development and critical thinking. In an inclusive classroom, all children need to feel comfortable enough to make public their ideas and to challenge those of their peers if they are to progress mathematically.

Ronda's (2012) 'Four Freedoms' to support development in maths for every child in an inclusive classroom are:

1. Freedom to make mistakes
2. Freedom to ask questions
3. Freedom to think for yourself
4. Freedom to choose your own methods

'Talk is an important way to build that sense of community and to help children grapple with important mathematical ideas.'

(Kazemi and Hintz 2014 p.14)

'... It's easy to start a discussion by asking children to share their thinking... Knowing what to do with students' ideas and teaching children how to meaningfully participate in discussions can be a lot more daunting.'

(Kazemi and Hintz 2014)

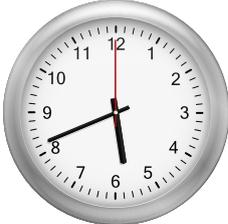

Engaging children in productive Maths Talk

It can be challenging for teachers to ensure that productive Maths Talk emanates from classroom tasks. It will not happen without appropriately challenging and engaging tasks. Focusing on a clear learning outcome can help the teacher select which talk move is most appropriate at each stage of the lesson.

The Productive Talks Move table is based on Chapin *et al.*'s (2009) 'Talk Moves' helping the teacher identify the purpose of the 'Talk Move', explaining how this is executed and some examples are provided to get the discourse started.

Productive Talk Moves Teacher can engage in (based on Chapin et al. (2009))

1. Helping individual children clarify and share their own thoughts

	<table border="1"> <thead> <tr> <th data-bbox="520 230 671 264">Talk Move:</th> <th data-bbox="671 230 1458 264">Wait Time</th> </tr> </thead> <tbody> <tr> <td data-bbox="520 264 671 315">Purpose?</td> <td data-bbox="671 264 1458 315">Gives children time to formulate and verbalise thoughts.</td> </tr> <tr> <td data-bbox="520 315 671 398">How?</td> <td data-bbox="671 315 1458 398">Teacher waits at least 4 seconds after asking the question before taking answers.</td> </tr> <tr> <td data-bbox="520 398 671 465">Example:</td> <td data-bbox="671 398 1458 465">'I know you're thinking hard. In a little while I'm going to ask you for your ideas. Think about what you are going to say.'</td> </tr> </tbody> </table>	Talk Move:	Wait Time	Purpose?	Gives children time to formulate and verbalise thoughts.	How?	Teacher waits at least 4 seconds after asking the question before taking answers.	Example:	'I know you're thinking hard. In a little while I'm going to ask you for your ideas. Think about what you are going to say.'
Talk Move:	Wait Time								
Purpose?	Gives children time to formulate and verbalise thoughts.								
How?	Teacher waits at least 4 seconds after asking the question before taking answers.								
Example:	'I know you're thinking hard. In a little while I'm going to ask you for your ideas. Think about what you are going to say.'								
	<table border="1"> <thead> <tr> <th data-bbox="520 465 671 499">Talk Move:</th> <th data-bbox="671 465 1458 499">Turn and Talk</th> </tr> </thead> <tbody> <tr> <td data-bbox="520 499 671 582">Purpose?</td> <td data-bbox="671 499 1458 582">Gives children individual time to focus and refine their thoughts with a partner.</td> </tr> <tr> <td data-bbox="520 582 671 665">How?</td> <td data-bbox="671 582 1458 665">Teacher allows children 30 seconds to work alone; then one minute to verbalise thoughts with partner.</td> </tr> <tr> <td data-bbox="520 665 671 745">Example:</td> <td data-bbox="671 665 1458 745">'Think about this question for thirty seconds and then share your thoughts with your partner.'</td> </tr> </tbody> </table>	Talk Move:	Turn and Talk	Purpose?	Gives children individual time to focus and refine their thoughts with a partner.	How?	Teacher allows children 30 seconds to work alone; then one minute to verbalise thoughts with partner.	Example:	'Think about this question for thirty seconds and then share your thoughts with your partner.'
Talk Move:	Turn and Talk								
Purpose?	Gives children individual time to focus and refine their thoughts with a partner.								
How?	Teacher allows children 30 seconds to work alone; then one minute to verbalise thoughts with partner.								
Example:	'Think about this question for thirty seconds and then share your thoughts with your partner.'								
	<table border="1"> <thead> <tr> <th data-bbox="520 745 671 779">Talk Move:</th> <th data-bbox="671 745 1458 779">Revoicing</th> </tr> </thead> <tbody> <tr> <td data-bbox="520 779 671 862">Purpose?</td> <td data-bbox="671 779 1458 862">Allows teacher to consider and check for understanding; allows other children to hear classmates' ideas again.</td> </tr> <tr> <td data-bbox="520 862 671 945">How?</td> <td data-bbox="671 862 1458 945">Teacher repeats all or part of a learner's response, checking with them that your interpretation is correct.</td> </tr> <tr> <td data-bbox="520 945 671 1025">Example:</td> <td data-bbox="671 945 1458 1025">'So, you're saying that...' or 'It sounds like you're saying... is that correct?'</td> </tr> </tbody> </table>	Talk Move:	Revoicing	Purpose?	Allows teacher to consider and check for understanding; allows other children to hear classmates' ideas again.	How?	Teacher repeats all or part of a learner's response, checking with them that your interpretation is correct.	Example:	'So, you're saying that...' or 'It sounds like you're saying... is that correct?'
Talk Move:	Revoicing								
Purpose?	Allows teacher to consider and check for understanding; allows other children to hear classmates' ideas again.								
How?	Teacher repeats all or part of a learner's response, checking with them that your interpretation is correct.								
Example:	'So, you're saying that...' or 'It sounds like you're saying... is that correct?'								
	<table border="1"> <thead> <tr> <th data-bbox="520 1025 671 1059">Talk Move:</th> <th data-bbox="671 1025 1458 1059">Say More/Clarifying</th> </tr> </thead> <tbody> <tr> <td data-bbox="520 1059 671 1142">Purpose?</td> <td data-bbox="671 1059 1458 1142">Allows teacher to prompt learner to share their thoughts more fully</td> </tr> <tr> <td data-bbox="520 1142 671 1225">How?</td> <td data-bbox="671 1142 1458 1225">Teacher encourages learner to expand on their response and clarify their thinking.</td> </tr> <tr> <td data-bbox="520 1225 671 1299">Example:</td> <td data-bbox="671 1225 1458 1299">'I'm not sure I understand, can you say more about what you're thinking?' or 'Can you give us an example?'</td> </tr> </tbody> </table>	Talk Move:	Say More/Clarifying	Purpose?	Allows teacher to prompt learner to share their thoughts more fully	How?	Teacher encourages learner to expand on their response and clarify their thinking.	Example:	'I'm not sure I understand, can you say more about what you're thinking?' or 'Can you give us an example?'
Talk Move:	Say More/Clarifying								
Purpose?	Allows teacher to prompt learner to share their thoughts more fully								
How?	Teacher encourages learner to expand on their response and clarify their thinking.								
Example:	'I'm not sure I understand, can you say more about what you're thinking?' or 'Can you give us an example?'								

2. Helping children orient to the thinking of others

	<table border="1"> <thead> <tr> <th data-bbox="520 1429 671 1462">Talk Move:</th> <th data-bbox="671 1429 1458 1462">Repeating</th> </tr> </thead> <tbody> <tr> <td data-bbox="520 1462 671 1514">Purpose?</td> <td data-bbox="671 1462 1458 1514">Children repeat or restate a classmate's idea.</td> </tr> <tr> <td data-bbox="520 1514 671 1597">How?</td> <td data-bbox="671 1514 1458 1597">Teacher asks learner to repeat or restate another learner's thinking.</td> </tr> <tr> <td data-bbox="520 1597 671 1664">Example:</td> <td data-bbox="671 1597 1458 1664">'Can you repeat what [] said in your own words?' or 'Who can say that again?'</td> </tr> </tbody> </table>	Talk Move:	Repeating	Purpose?	Children repeat or restate a classmate's idea.	How?	Teacher asks learner to repeat or restate another learner's thinking.	Example:	'Can you repeat what [] said in your own words?' or 'Who can say that again?'
Talk Move:	Repeating								
Purpose?	Children repeat or restate a classmate's idea.								
How?	Teacher asks learner to repeat or restate another learner's thinking.								
Example:	'Can you repeat what [] said in your own words?' or 'Who can say that again?'								

3. Helping children deepen their own reasoning

	<table border="1"> <thead> <tr> <th data-bbox="520 1798 671 1832">Talk Move:</th> <th data-bbox="671 1798 1458 1832">Reasoning/Elaborating</th> </tr> </thead> <tbody> <tr> <td data-bbox="520 1832 671 1915">Purpose?</td> <td data-bbox="671 1832 1458 1915">Children justify and elaborate their thinking and support with evidence.</td> </tr> <tr> <td data-bbox="520 1915 671 1998">How?</td> <td data-bbox="671 1915 1458 1998">Teacher presses learner for further elaboration and evidence of their thinking.</td> </tr> <tr> <td data-bbox="520 1998 671 2056">Example:</td> <td data-bbox="671 1998 1458 2056">'Why do you think that?' or 'What convinces you?' or 'What is your evidence?'</td> </tr> </tbody> </table>	Talk Move:	Reasoning/Elaborating	Purpose?	Children justify and elaborate their thinking and support with evidence.	How?	Teacher presses learner for further elaboration and evidence of their thinking.	Example:	'Why do you think that?' or 'What convinces you?' or 'What is your evidence?'
Talk Move:	Reasoning/Elaborating								
Purpose?	Children justify and elaborate their thinking and support with evidence.								
How?	Teacher presses learner for further elaboration and evidence of their thinking.								
Example:	'Why do you think that?' or 'What convinces you?' or 'What is your evidence?'								

4. Helping children engage with the reasoning of others

	Talk Move:	Agree/Disagree
	Purpose?	Children are encouraged to respectfully agree or disagree with thinking of others.
	How?	Teacher asks children to say if they agree or disagree with a classmate's view... and to say why that is so.
	Example:	'What do you think of what [] said?', 'Do you agree?', 'Why?'
	Talk Move:	Adding On
	Purpose?	Offers an opportunity to all children to build on the ideas of others.
	How?	Teacher opens conversation to all children to promote discussion.
	Example:	'Does anyone have anything to add?', 'Can anyone say what we might do next?'

Sentence Stems:

1. ___ and ___ are similar/different because ___ .
2. ___'s idea reminds me of ___ .
3. ___ is important because ___ .
4. A better strategy would be ___ because ___ .
5. A definition that I learned today was ___ .
6. A new maths idea I learned was ___ .
7. Another strategy would be ___ because ___ .
8. I can prove my answer by ___ .
9. I can show this idea by ___ .
10. I have a different way to solve ___ .
11. I noticed that ___ .
12. I predict that ___ .
13. I think ___ because ___ .
14. I think that makes sense/doesn't make sense because ___ .
15. I want to add to what ___ said ___ .
16. If ___ then ___ .
17. My first step was/is ___ .
18. My strategy is the same as/different than yours because ___ .
19. Next time I solve a problem like this, I will ___ .
20. Something that is important to remember is ___ .
21. The answer is ___ because ___ .
22. The factors that are most important are ___ .
23. The first thing I did to solve this problem was ___ .
24. To prove my answer is reasonable, I can ___ .
25. What would happen if ___ ?
